# Mountain Weather Forecast

## Eryri (Snowdonia) National Park

Forecast valid from 06:00 on Friday 14 Jun 2024 until 23:59 on Saturday 15 Jun 2024

Forecast Issued on Friday 14 Jun 2024 at 01:15

**Confidence:** High for sunshine and showers through the period, with a trend towards drier weather into the coming week. However low in terms of the shower details and for the position of any organised or slow-moving bands of rain or showers. High confidence for temperatures to remain on the rather cool side for the time of year.

**Headline for Friday 14 Jun 2024:** Dull start, with some drizzle possible. Then sunny spells and occasional showers, perhaps thundery.

**Mountain weather hazards on Friday 14 Jun 2024**

| 60% | 60% | 70% | 60% | 40% | 20% |

**Forecast for Friday 14 Jun 2024**

**Weather:** Early cloud and the odd spot of drizzle soon lifting. Then a day of sunny spells and heavy showers, with a chance of thunder. These most likely later in the afternoon, but possible from late morning. Showers easing during the evening, to leave variable cloud and clear spells. Feeling rather cool for June, but still some warm sunshine.

**Chance of cloud-free hill tops above 800m:** 30% rising to 60% by mid-morning

**Low Cloud and visibility:** Some overnight cloud lingering on slopes above 600m first thing, but soon lifting and breaking above most summits. Although the odd patch could linger on tops above 900m. Cloud also returning during any showers, descending to obscure routes above 800m and perhaps as low as 600m in heavier bursts. Visibility excellent outside of rain, but very poor in early drizzle and moderate to poor in heavy rain or showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

**Meteorologist's View**

A cold day, and potentially feeling below freezing at times, especially on exposed summits and in the wind. Showers are also likely, and these could turn thundery, so worth checking what to do if caught in a thunderstorm. Despite cooler temperatures, UV levels will be high in any sunshine. So warm waterproof layers, and appropriate sun protection needed.

**Forecast for Saturday 15 Jun 2024**

**Weather:** A similar day to Friday, with sunny spells but also heavy showers and isolated thunderstorms possible throughout. Periods of lower cloud also possible, perhaps most likely during the early hours and then again during the afternoon, which could bring more widespread bands of showers for a time.

**Maximum wind:** Southwest 20-25 mph with gusts 30-40mph, easing west 15mph by the evening.

**Chance of cloud-free hill tops above 800m:** 30% early morning, improving to 70% for a time, but falling to 50% in the west by mid-afternoon.

**Low Cloud and visibility:** Areas of cloud possibly obscuring routes above 600m at times, and struggling to clear hills above 900m. These most likely early morning and from mid-afternoon in the west. Heavy showers could also bring brief periods of cloud down to 600m. Outside of cloud, visibility will be very good to excellent, but falling to poor or moderate in any heavy rain.

**Temperature:** **Valleys:** Plus 8 Celsius rising to Plus 13 Celsius.
**At 800m:** Plus 3 Celsius rising to Plus 7 Celsius.
**Freezing level:** Above summits.
